

Get it right first time with the
CTS Cable Hound.

**Low cost, fast & easy,
guided build of small
cable assemblies.**

This exciting new wiring aid has been designed and manufactured to exacting standards by Combined Test Solutions Ltd in Bedfordshire, England. Its primary aim is to enable low-cost, fast and easy, guided build of small cable assemblies, enabling 100% correct wiring at the point of build.

**100% correct wiring at
the point of build.**

**Designed & manufactured
to exacting UK standards**

Product Features

- Fast, easy to use – starts paying for itself immediately
- Compact and lightweight, 70mm by 180mm wide and 180mm deep.
- 128 test points, standard 64-way connectors, identifies and guides using connectors/assemblies up to that pin count
- Available with custom connector interface options.
- The beeper sounds when the correct wire is found (in SELECT mode) and the LED lights green.
- Displays PINs connected in groups (earth/shell connections).
- Has two probe sockets (low & Hi impedance) for probing or touching a wire (using a wrist strap).
- 9v internal battery (fully portable) & 12v wall plug power options
- Modern design using fast ARM processor and CMOS switching for reliability.

New Rugged Carry Case Option

Available Now

Easy To Use

1 - “Select” - The operator chooses a wire by number (from 1 to 128) and is informed with a bleep and visually, via the LCD display, when the selected wire is touched, enabling correct placement of the wire probed.

2 - “Identify” – If the operator needs the device to find a particular wire it will bleep and display the wire number on the screen when it is correctly probed.
